

Claim Amendments

This listing of the claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (currently amended): A cable reel, comprising:

a base plate;

a reel body rotatably mounted with respect to said base plate;

a braking coulisse moveable in a radial direction with respect to said base plate; and

elastic elements for mounting at least one of said base plate and said ~~reel body~~ braking coulisse in a receiving body.

Claim 2 (original): The cable reel according to claim 1, wherein said elastic elements are disposed between said braking coulisse and said receiving body.

Claim 3 (original): The cable reel according to claim 1, wherein said elastic elements are disposed between said base plate and said receiving body.

Claim 4 (original): The cable reel according to claim 1,
wherein said cable reel is mounted in said receiving body as a
whole by said elastic elements.

Claim 5 (original): The cable reel according to claim 1,
wherein said receiving body is a vacuum cleaner.

Claim 6 (currently amended): A vacuum cleaner cable reel,
comprising:

a base plate;

a reel body rotatably mounted with respect to said base plate;

a braking coulisse moveable in a radial direction with respect
to said base plate; and

elastic elements for mounting at least one of said base plate
and said ~~reel-body~~ braking coulisse in a vacuum cleaner.

Claim 7 (original): The cable reel according to claim 6,
wherein said elastic elements are disposed between said
braking coulisse and said vacuum cleaner.

Claim 8 (original): The cable reel according to claim 6, wherein said elastic elements are disposed between said base plate and said vacuum cleaner.

Claim 9 (original): The cable reel according to claim 6, wherein said cable reel is mounted in said vacuum cleaner as a whole by said elastic elements.

Claim 10 (currently amended): In a vacuum cleaner having a housing part, a cable reel, comprising:

a base plate defining an axis;

a reel body rotatably mounted to said base plate about said axis;

a braking coulisse operatively connected to said reel body for braking rotation of said reel body about said base plate, said braking coulisse moving in a radial direction with respect to said axis of said base plate to brake said reel body; and

elastic elements connected to at least one of said base plate and said ~~reel body~~ braking coulisse and mounting said at least one of said base plate and said ~~reel body~~ braking coulisse in the housing part of the vacuum cleaner.

Claim 11 (original): The cable reel according to claim 10, wherein said elastic elements are disposed between said braking coulisse and said vacuum cleaner.

Claim 12 (original): The cable reel according to claim 10, wherein said elastic elements are disposed between said base plate and said vacuum cleaner.

Claim 13 (original): The cable reel according to claim 10, wherein said cable reel is mounted in said vacuum cleaner as a whole by said elastic elements.

Claim 14 (currently amended): A cable reel, comprising:

a base plate defining an axis;

a reel body rotatably mounted to said base plate about said axis;

a braking coulisse operatively connected to said reel body for braking rotation of said reel body about said base plate, said braking coulisse moving in a radial direction with respect to said axis of said base plate to brake said reel body; and

Applic. No. 10/791,594
Amdt. dated October 19, 2004
Reply to Office action of July 19, 2004

elastic elements connected to at least one of said base plate
and said ~~reel-body~~ braking coulisse for mounting said at least
one of said base plate and said ~~reel-body~~ braking coulisse in
a receiving body.
